### ABOUT ME

Since 2020, I have been active in the theater scene in Hamburg, working as a freelance technician, light designer and technical director for productions and festivals. Following the completion of my event technology specialist traineeship in 2023, I began working as a light operator under contract at Thalia Theater in Hamburg. Through my current work and experience in the freelance scene, I have gained an extensive knowledge of the creation and execution of dance and theater productions with both repertory and tour perspectives, from technical drafting to on-site personnel coordination. My focus is on lighting, media and stage technology. I also offer expertise in sound, and event safety and planning. With my background in professional ballet, I bring additional stage and production experience, with an understanding of dance company processes, as well as the necessary communication skills to collaborate with various theater departments, contractors and production teams.
